OUR IMPACT

THE HIGHLANDERS

TEAM 4499 - FORT COLLINS, CO

TEAMINFO@HIGHLANDERSFRC.COM

ABOUT US

We are a team of 25 students from 6 schools and 4 cities. Our team's mission is to give children, from elementary through high school, the opportunity to experience STEM in real life, and to have fun building robots while we do it! 4499 students embark on a journey pursuing their STEM curiosity through hands on learning and our teams' Cycle of Success initiative (COS). COS is a peer-to-peer learning system where senior students and alumni work to teach younger students.

CONNECT

The Highlanders started Shop Talk, Drop In Shop Days and a Summer How-to-Swerve so we can **CONNECT** with our friends and community.

INSPIRE

Our team has participated in many virtual and in-person, *FIRST* and non-*FIRST* events and show our robot. We hope to **INSPIRE** younger students how fun robotics!

ENGAGE

The Highlanders openly invite anyone to join our program and hope to **ENGAGE** anyone with any ability!

BUILD

The Highlanders are **BUILDING** relationships with other teams, sponsors, experts and the *FIRST* community.

CHANGE

The Highlanders had to **CHANGE** how we engaged with our community. We are in community parades and build costumes for celebrating Halloween.

OPPORTUNITIES

As a Highlander you can be part of some amazing programs and **OPPORTUNITIES** with our sponsor like internships
